

# St. Paul District Dredge Material Management Plan (DMMP) After Action Review

## ERDC Dredging Operations Technical Support Program (DOTS)

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

### Response Summary:

This effort was an after-action review (AAR) of the successes and challenges of the recent St. Paul District (MVP) DMMP efforts related to their channel maintenance program. While at MVD Mr. Emery worked in conjunction with MVP Operations staff to progress the program to better meet future needs.

### Period of Performance:

This was a one-day event on 8/4/20

### Benefits of the Response to the USACE Dredging/Navigation Program:

This AAR provided MVP an opportunity to review all the DMMP efforts over the last couple years, allowing them to identify practices and procedures that have worked well, and others that haven't, along with developing a strategy for future DMMPs. Input from Mr. Emery provided the district with a division-level perspective on their program, information needed to take the actions need to improve the DMMP going forward.

### Deliverable:

The only deliverable was to provide technical input and engage with the Operations team during the AAR. The completed AAR identified lessons learned and a proper process from previous DMMPs to be applied to future DMMPs.

Providing environmental and engineering technical support to the U.S. Army Corps of Engineers  
Operations and Maintenance navigation and dredging missions
