Dr. Jarrell Smith is a Research Civil Engineer with the Coastal & Hydraulics Lab of the Engineer Research & Development Center. He has been engaged in sediment transport and dredging-related research for more than 30 years. Much of the focus of his research involves the implications of small-scale physical transport phenomena on dredged material management. He earned a BS and MS in Civil Engineering in 1992 and 1994 from Clemson University and a PhD in Marine Science-Physical Oceanography from William and Mary in 2010.
